

Lenox Hill Radiology Joins LIPIX

New York City, NY – June 12, 2011 – The Long Island Patient Information eXchange (LIPIX), the largest Regional Health Information Organization (RHIO) for downstate New York, announced that Lenox Hill Radiology and Medical Imaging Associates, PC and its affiliate practices have joined the 73 other care-providing facilities currently participating in the LIPIX network.

By joining LIPIX, Lenox Hill Radiology allows clinicians throughout the community to access patient test results from its four sites – Lenox Hill Radiology, Brooklyn Heights Medical Imaging, Regency Medical Imaging and Madison Avenue Medical Imaging. At the same time, Lenox Hill Radiology clinicians are able to electronically access patient-centric data, including patient histories, test results, diagnoses, and medication lists from any of the other connected providers.

"We look forward to utilizing LIPIX at our practice, as it supports our efforts in providing the best in patient care. We expect that the resulting transparency from a consolidated source for patient information will yield all sorts of benefits, including the reduction of unnecessary testing, operational efficiencies, and ultimately, better patient care," said, Dr. John Melnick, Medical Director of Lenox Hill Radiology.

With the addition of Lenox Hill Radiology's four sites, "LIPIX is very excited to further expand into Manhattan and the other Boroughs. The continued adoption of LIPIX's services by well-regarded providers such as Lenox Hill Radiology highlights the importance of collaboration within the medical community," said LIPIX CEO, Benjamin Stein, MD. Dr. Stein also discussed the future of LIPIX, "Our significant expansion is enabling us to generalize the value and lessons learned from operating on Long Island for the last three years. We shall be announcing a new name to reflect our widening region and some exciting new features in the upcoming months."

Long Island Patient Information eXchange (LIPIX) is an independent not-for-profit corporation maintaining and growing the largest Regional Health Information Organization (RHIO) in downstate New York. LIPIX provides services that allow any registered clinician to access patient-centric data compiled in partnership with patient care facilities throughout Long Island, Queens, Manhattan, Westchester, and Staten Island. LIPIX offers clinician services including secure messaging, ePrescribing, Medication Reconciliation and Results Distribution. LIPIX also offers patient services including finding clinicians and appointment scheduling through their "HealthBook" product. Today, the LIPIX web-based platform connects 77 facilities, 2.6 million patients and over 2,000 clinicians. For more information, check out <http://www.lipix.org>.

Lenox Hill Radiology and Medical Imaging Associates, PC, Madison Avenue Medical Imaging, Regency Medical Imaging and Brooklyn Heights Imaging are radiologist owned and operated outpatient imaging centers. The facilities have 18 board certified fellowship trained radiologists who specialties include PET/CT and Oncologic Imaging, Diagnostic and Interventional Musculoskeletal Radiology, Neuroradiology, Ultrasound and Body Imaging and Women's Imaging. These highly skilled professionals coupled with state-of-the-art equipment insure that patients and their physicians receive the highest level of medical care and personal service. Evening and weekend hours are available for all exams by appointment, immediate appointments upon request. Most insurances accepted. For more information, check out www.lenoxhillradiology.com.
