# Patient Gateway Service

## Major Benefits of the LIPIX Patient Gateway include:

- Paperless transfer of selected test results between physician and patient
- The intuitive interface and improvements in physician—patient communication promote use and enhance loyalty
- Patients become more involved in their care while simultaneously improving the efficiency of the physician-patient interaction

**LIPIX Patient Gateway facilitates** effective and smooth communication between physicians and patients by leveraging the intuitive LIPIX viewer portal to provide a simple and secure medium for managing patient-physician interactions.

**The LIPIX Patient Gateway can simplify** many of the common patient-physician interactions, including:

- Requesting a prescription refill
- Scheduling an appointment
- Sending automated appointment reminders
- Rescheduling an appointment
- Requesting an insurance referral
- Updating insurance information
- Delivering test results via the LIPIX portal or secure fax message

**Benefits** of using the LIPIX Patient Gateway include:

- Increased patient loyalty
- Faster and more accurate communications
- More efficient scheduling
- Elimination of administrative inefficiencies and improvement in the patient-physician relationship
