

Secure Messaging Service

lipix

Major Benefits of LIPIX Secure Messaging Services include:

- Paperless transfer of patient clinical data between healthcare providers
- Easily managed data views through the LIPIX Clinical Viewer
- Seamless continuity of care for patients transferred between facilities
- Smoothly integrates with current provider workflows

LIPIX Secure Messaging provides a secure web-based solution for sharing structured clinical information with other LIPIX members.

Functionality—LIPIX Secure Messaging can be used to communicate key patient clinical data from one provider to another in a secure and easily managed interface resulting in:

- Faster receipt of valuable patient clinical information
- The ability for clinicians to integrate more information on a patient's medical history into their decisions at the point of care.
- Minimization of the potential for duplicated, unnecessary and costly tests.

Use Cases—Secure Messaging can be a valuable tool for a number of clinical communication situations, including:

- Outpatient referrals
- Specialist consultation requests
- Transfer of patients between care providing organizations
- Patient admission to an Emergency Department
- Hospital Information transfer for patient follow up

Meaningful Use—LIPIX Secure Messaging helps providers achieve meaningful use:

- Facilitate the electronic exchange of key clinical information among providers of care and patient authorized entities.
- Provide a summary of care record for each transition of care and referral.
- Perform medication reconciliation at relevant encounters and each transition of care
